

# Letter of Support for the Port of Kingston Grant Application for EV Charging Stations

Kingston/KCAC/KCAC Co-Chair

**Greg Englin**

Tue, Dec 30, 11:47 PM  
(14 hours ago)

to me, Glen, Greg

Dear Tim and Glen,

The Port of Kingston is applying for grant funding from the Washington State Department of Commerce to install six (6) high speed electric vehicle (EV) charging stations on port property. There are currently no EV charging stations at the Port of Kingston nor in downtown Kingston including the Village Green. This a unique grant opportunity in that it does not require a match (amount) to qualify. Also, it does not require the applicant to be located in an economically disadvantaged area.

We are requesting a letter of support from organizations and people in the community. We would appreciate a letter of endorsement for our application from Kingston Citizens Advisory Council. If you would discuss it with your colleagues and send us a letter of support or share with the Port Commission – or your thoughts – we would be grateful for your support or feedback. Please simply send us a letter or email as soon as you are able and we will include it on a rolling basis.

Thank you for your consideration.

Best regards,

Greg
