

ELDORADO

State Environmental Policy Act (SEPA) Checklist and Determination

The project is subject to an environmental review using the State Environmental Policy Act (SEPA) to determine scale of environmental impacts, and commensurate conditions to mitigate impact. As described in the 6-27-20 Notice of Application, the county is using the optional DNS process, allowed by SEPA under WAC 197.11.355 in which the Notice of Application and the SEPA threshold determination are reviewed concurrently. The SEPA checklist will be available for review and comment, and comments to DCD on environmental impact will inform on a final SEPA determination. A SEPA determination may be appealed to the Kitsap County Hearing Examiner if filed within 14 days of the date of the determination.
