For example: On a seven thousand five-hundred-square-foot lot in ULR zone (three credits needed) with one twenty-four-inch DBH tree, one twelve-inch DBH tree, and two six-inch DBH trees, the minimum tree unit credits are met by retaining the twenty-four-inch DBH tree only, or retaining the twelve-inch DBH tree and one <u>both</u> of the six-inch DBH trees, or remove all trees on site and plant six <u>three</u> new deciduous or three new conifers to meet the minimum tree density units for the lot.	The deciduous tree credit was updated from 0.5 to 1, but the example math in the footnote of table 17.495.030-2 was not updated.
