KITSAP COUNTY DEPARTMENT OF PUBLIC WORKS COUNTY ROAD PROJECT NO. 3686

SILVERDALE WAY PRESERVATION OVERLAY AND STORMWATER RETROFIT

Questions & Answers – February 3, 2025 Attachment to ADDENDUM # 1

The County has received Questions from prospective bidders. Below are the County's corresponding answers:

Question: Can the County please provide the locations of the pavement repair?

Answer: Based on the wear of the travel lanes, the quantity is based on the estimation that 10% of the northbound lanes on Silverdale Way, 20% of the southbound lanes on Silverdale Way, and 20% of Bucklin Hill Rd (eastbound and westbound) will require pavement repairs. The pavement repair locations will be marked out by the Engineer following the removal of the asphalt wearing course.

Question: Based on the project specifications, the recycled rock is to be included in the "Pavement Repair Excavation" item. We will need to know the widths and lengths of the area that is to include rock and the same for the paving.

Answer: Per section 5-04.3(4)C of the special provisions, "the Contractor shall excavate pavement repair areas in accordance with the details shown in the Plans and as marked in the field. The minimum width of any pavement repair area shall be 40 inches unless shown otherwise in the Plans". Refer to plan sheet 7, detail B for pavement repair excavation.

Question: Please provide a separate pay item for pavement repair asphalt.

Answer: In accordance with Section 5-04.5 of the special provisions, "HMA pavement below the overlay shall be included in the 'Pavement Repair Excavation Incl. Haul'".

Question: What is the thickness of the existing asphalt on Silverdale Way?

Answer: The approximate thickness of the existing asphalt pavement on Silverdale Way NW and on NW Bucklin Hill Rd is provided in Section 2-02.3(3) of the special provisions.

Question: Regarding Silverdale Way and the asphalt cross section (specifically the patching in front of the new concrete), please confirm that (the County) want(s) to use the fiber reinforced mix in the patching sections in front of the concrete (as shown on sheet 6), whereas the Repair section (as shown on sheet 7, Detail B) uses regular 1/2”?

Answer: The Fiber-Reinforced HMA under the grind and overlay in the Typical Sidewalk Reconstruction Section B and in the Island Section D, shown on sheet 6 in the Contract Plans, are revised to “HMA CL. 1/2 IN. PG 58H-22”.

Question: The spec, “Except in the case of emergency or unless otherwise approved by the Engineer, the normal working hours for the Contract shall be any consecutive 8-hour period between the hours of 6:00 p.m. and 6:00 a.m. Monday through Friday, exclusive of a lunch break. If the Contractor desires different than the normal working hours stated above, the request must be submitted in writing prior to the preconstruction conference, subject to the provisions below. The working hours for the Contract shall be established at or prior to the preconstruction conference.

Exception to the normal working hours: Concrete work may be done between the hours of 6:00 a.m. and 6:00 p.m.”

Question- Is concrete support activities .. prep/grade/etc.. also included in that exemption?

Answer: Yes.
