Certificate Concerning Design and Construction of Electronic Speed Measuring Devices
IRLJ Rule 6.6

I, Lee Hobdy, do certify under penalty of perjury as follows:

I am employed with MPH Industries as a Service Technician.

Part of my duties include overseeing the certification and calibration of speed measuring devices (SMD's).

The radar model being calibrated: Python III

The serial number(s) of its display/counting unit(s): 123902344

The serial number(s) of its antenna(s): f: 831018231 r: 831018232

I have the following qualifications with respect to the above stated SMD.

I am a Production Technician with MPH Industries, Inc. I have received a Bachelor of Science Degree in Electromechanical Engineering Technology with a minor in Computer Information Systems from Murray State University. My responsibilities at MPH include the building, testing and calibration of SMD's. I possess a General Radiotelephone Operator license (PG00076593) and have been a technician for MPH for 1 year.

Our company maintains records for all of the above stated SMD's. I am personally familiar with those manuals and how each of SMD's are designed and operated. All initial testing of the SMD's was conducted under my direction. The units were evaluated to meet or exceed existing performance standards. Our company maintains a testing and certification program of these SMD's. The SMD listed above was tested and calibrated for accuracy with tractability to the National Institute of Standards and Technology (formerly National Bureau of Standards). If tuning forks accompanied the SMD, they also were certified as accurate.

Based upon my education, training, experience and my knowledge of the SMD's listed above, it is my opinion that each of these pieces of equipment is so designed and constructed as to accurately employ the Doppler effects such that it will give accurate measurements of the speed of motor vehicles when properly calibrated and operated by trained personnel.

MPH Industries does hereby certify the above listed radar unit meets manufacturer's published specifications and has been calibrated using standards whose accuracies are traceable to the National Institute of Standards and Technology.
